

LF0640

LF0640 fiber laser cutting machine is special for high precision machinery parts and microelectronics industry. Faster speed and higher precision professional for cutting thin metal sheet like stainless steel, carbon steel, Galvanized steel, etc.

Double grinding ball screw work with Panasonic servo system, make sure the precision.

Small size, save your space.

Whole covered, protect you from laser damage.

Technical Parameter

Machine Model	LF0640
Laser power	300W 500W 750W 1000W(Optional)
Working area	600mmx400mm
Repeat positioning accuracy	±0.01mm
Maximum speed	40m/min
Maximum acceleration	0.5G
Transmission mode	Grinding precision screw drier drive
Power supply rated voltage and frequency	380V/50Hz/60Hz/60A

Application Industry

For machinery or microelectronics industry, the requirement of product precision are extremely high, with LF1390/ 0640 can do precise working with materials. This is the reason why the models are widely used in glasses, electronics and other industries.
