

## LF1325L

LF1325L is mainly designed for advertisement industry, specially for thin sheet cutting. This machine is small and exquisite, adopt modular design as a whole set, help to decrease running and maintenance cost.

Concentrate on metal cutting, fast speed, high precision.

Modular design, decrease maintenance cost.

Gantry structure, imported high precision ballscrew transmission, running stable.

## Technical Parameter

Equipment model	LF1325L
Laser power	300W 500W 750W(Optional)
Dimension	3800*1850*1300mm
Maximum cutting thickness	8mm
Working area	1250×2500mm
Workbench repeat positioning accuracy	±0.03mm/m
Power supply	220V/50Hz

## Application Industry

Advertisement metal characters, stainless steel kitchenware, environmental protection equipment etc. common objects in everyday life, all of them are the areas which LF1325L fiber laser cutting machine expertise. Fast speed, high precision, it makes LF1325L becoming the first choice machine for advertisement industry.
